

Overcome the temperature and compatibility limitations of fabric or synthetic fiber cartridges.

Plain cylindrical, with Buna-N seal

Plain cylindrical, with male NPT connection

Pleat protectors

Pleated cylindrical, with thin Buna-N seal

Pleated cylindrical, with female NPT connection

Pleated cylindrical, with 222 O-rings in silicone

FEATURES AND BENEFITS:

- Go green and save time and money, changing your fabric or synthetic fiber cartridges for our Filtrindustries® reusable stainless steel wire cloth elements. They are good up to 500oF and they are unaffected by most chemicals.
- Made entirely of 304 or 316 stainless steel, they are cleanable and reusable. They can withstand differential pressures up to 60 PSI (high pressure units are also available). You can choose particle retention ratings as fine as 5 microns.
